

GARPA

GARTEN & PARK EINRICHTUNGEN

GARPA *Garden and Park Furniture*

For more than 40 years now Garpa has been designing timelessly beautiful furniture in high-quality, enduring materials for the garden, terrace, and interior. The company, founded in 1979 by Heinz Holert, was the first to introduce superior-quality teak furniture for outdoor use to Germany. This was followed soon afterwards by Garpa's own innovations such as the series Fontenay, Bolero or Pan, which are today considered classics. Chairs, benches, tables, loungers and steamer chairs, parasols and accessories, are all part of the extensive collection. The products are distributed through the catalogue and the Internet by direct dispatch.

Besides the original teak wood, Garpa has continually extended its purview to encompass new materials. Since the introduction of aluminium and stainless steel, high-quality synthetic weave has become a valuable addition in the utilisation of materials which are a match for the particular demands of outdoor living. Our current collection is determined by individual innovations, realised in close cooperation with highly specialised designers and technicians and consequently, distinguished by a unique quality standard.

The comprehensive catalogue is a guide through the diverse style worlds of the Garpa collection and presents not only elegant outdoor living arrangements, but also an exclusive selection for indoors. It introduces seating and reclining furniture as well as a whole variety of accessories for the garden, terrace, and living areas, whether in the city or for country houses and holiday hideaways; in fact, everywhere one seeks privacy and relaxation.

Garpa delivers directly and at no charge to your home address – within Germany, to Austria, Switzerland, Great Britain, and to the holiday areas around the Mediterranean. In addition to the detailed catalogue and telephone customer service, there is always the opportunity for a personal consultation and for trying out furniture in the six permanent showrooms in Germany, as well as at branches in Santa Ponsa (Mallorca), Vienna and Zurich. Furthermore, Garpa has a sales office in Lewes near London.
